

# GS330

## Scheda interfaccia per GS300, GS310

### Interface Unit

---

The GS330 is a high security interface unit that can be used when you want to connect the GS300/310 glass break detectors for balanced DC loops to a control panel without balanced loop connection. The GS330 can also be used if the balanced loop of the control panel has a loop voltage lower than 6 V or if you want to divide a large number of glass break detectors into smaller zones.

### Features

---

The GS118N is equipped with a tamper protected cast metal housing. The detector loop is double balanced and has separate LED indication for alarm and tamper alarm (open loop or short circuit). The interface unit can be remote reset with a "+" or "-" pulse from the control panel. The polarity is set with a jumper.

### Dettagli

---

- Plastic housing
- Balanced loop
- Relay output
- LED alarm indicator
- Reset button
- LED tamper indication
- Remote reset feature
- VdS Stickers provided

# GS330

## Scheda interfaccia per GS300, GS310

### Specifiche tecniche

---

#### Generale

|                 |                       |
|-----------------|-----------------------|
| Accessory group | Sensori Rottura vetri |
| Type            | Parti di ricambio     |

#### Elettrico

|                         |  |
|-------------------------|--|
| Valore di alimentazione | 10 to 15 VDC                                     |
| Consumo attuale         | 8 mA at 12 V (normal)<br>17 mA at 12 VDC (alarm) |

#### Fisico

|                     |                 |
|---------------------|-----------------|
| Physical dimensions | 85 x 85 x 26 mm |
|---------------------|-----------------|

#### Ambientale

|                       |              |
|-----------------------|--------------|
| Temperatura operativa | -30 to +60°C |
|-----------------------|--------------|

#### Max. ripple

2 V

#### Alarm output

120 mA at 15 V

#### Tamper

15 VDC - 120 mA
