Obligation of the Certificate Holder

An opinion is valid at the time of issue and relates only to the situation at that time. It is the manufacturer's responsibility to seek an updated opinion if they believe that a change in design, manufacture, requirements or any other factor may affect the validity of this opinion.

In this sense there is no "duration of validity" for a notified body opinion. It remains valid for as long as the manufacturer continues to produce the product and make it available. If there is a change, it is the responsibility of the manufacturer to determine the need for a new updated opinion.

The Declaration of Conformity must be supplied with each product.
