

ATS8500-2

Standalone downloader - versione USB

Product Overview

ATS8500 provides a simple, open look Windows® interface that simplifies the programming of all the Advisor Advanced and Advisor Master options, stored in an SQL database.

Up/download

A PC running ATS8500 can be connected to a control panel either remotely via the built-in PSTN dialer and ethernet/GPRS connection or locally via USB.

ATS8500 is capable of up and downloading the entire database of the panel at once or synchronize the changes made.

Back-up facility

ATS8500 has a back-up and archiving facility for all panels stored in an SQL database.

Reports

A powerful report printing facility produces detailed programming sheets for all system information contained within the ATS8500. This feature enables quick reference for trouble shooting, expansion, programming and client administration.

It also features a range of flexible history reports, which can be produced with any combination of date/time ranges, keypads, users or other parameters and the most complicated queries can be achieved.

Remote Command and Control

All Advisor Advanced and Master control panels can run a Command & Control session with the ATS8500. It will provide a complete overview of the panel status including zone, area, communication path, etc.

The ATS8500 can provide full control over the panel remotely.

Real time event log

A real-time event log shows all events as they happen with a time and date stamped description of the event. History can be viewed as a constantly visible window in the Command & Control tab.

Supported Languages

Volume 1: European Multilingual CD-ROM edition supported languages:

Danish, Norwegian, Finnish, Swedish, French, Turkish, Polish, Slovakian, Tschech, Dutch, English Irish, English UK, French, German, Italian, Portugal and Spanish

Dettagli

- Powerful programming & management tool
- Full up/download capabilities
- SQL database
- Report creation engine for trouble shooting and client administration
- Command & Control support
- Remote diagnostics in line with EN50131
- Real time event logging
- Multi panel connections
- Restore points & Comparison tool

Standalone downloader - versione USB

Specifiche tecniche

Generale

| | |
|----------------------|----------------------------|
| Product line | Advisor Advanced |
| Segmentazione | Commerciale |
| Software type | Software di configurazione |
| Supported technology | Access Control, Intrusione |
| Hardware supportato | Advisor Advanced |

Dettagli software

| | |
|-----------------------|------------------|
| Software architecture | Standalone |
| Tipo licenza | Licenza gratuita |

Requisiti di sistema

| | |
|------------------------------|------------------------------------|
| Sistema operativo supportato | Windows 10, Windows 7, Windows 8.x |
| Supporto database | SQL |
| Requisiti minimi di sistema | Intel Dual Core i5 with 4GB RAM |

Computer Requirements

| | |
|--|---|
| | Windows 7, 8, 10 (32, 64 bit) |
| | 400 MHz Pentium processor or equivalent (Minimum); 1GHz Pentium processor or equivalent (Recommended) |
| | RAM:256 MB (Minimum); 1GB (Recommended) |
| | Up to 500 MB of available space may be required |
| | Display: 1024 x 768, 32-bit (Minimum) |

Max. number of PC with ATS8500 connected

| | |
|--|---|
| | 1 |
|--|---|

Max. number of panels in database

| | |
|--|----------------|
| | Limited by SQL |
|--|----------------|
